

Beef / Meat

Degrees of Cooking : It is not easy to determine the time required to cook meat. This depends mainly on the quality and conditioning of the meat, the age of animal, the amount of fat present and the firmness of the flesh. The size of the cut also determines the level of cooking. A meat thermometer can also be used.

Quality of Meat

Beef

1. The meat should be pinkish red in color

2. Should have well marbled fat.

3. Should not have any patch marks. (Mostly white)

4. Fat should be firm and brittle.

Veal

Flesh should be white or very pale pink.

Flesh should be soft to touch.

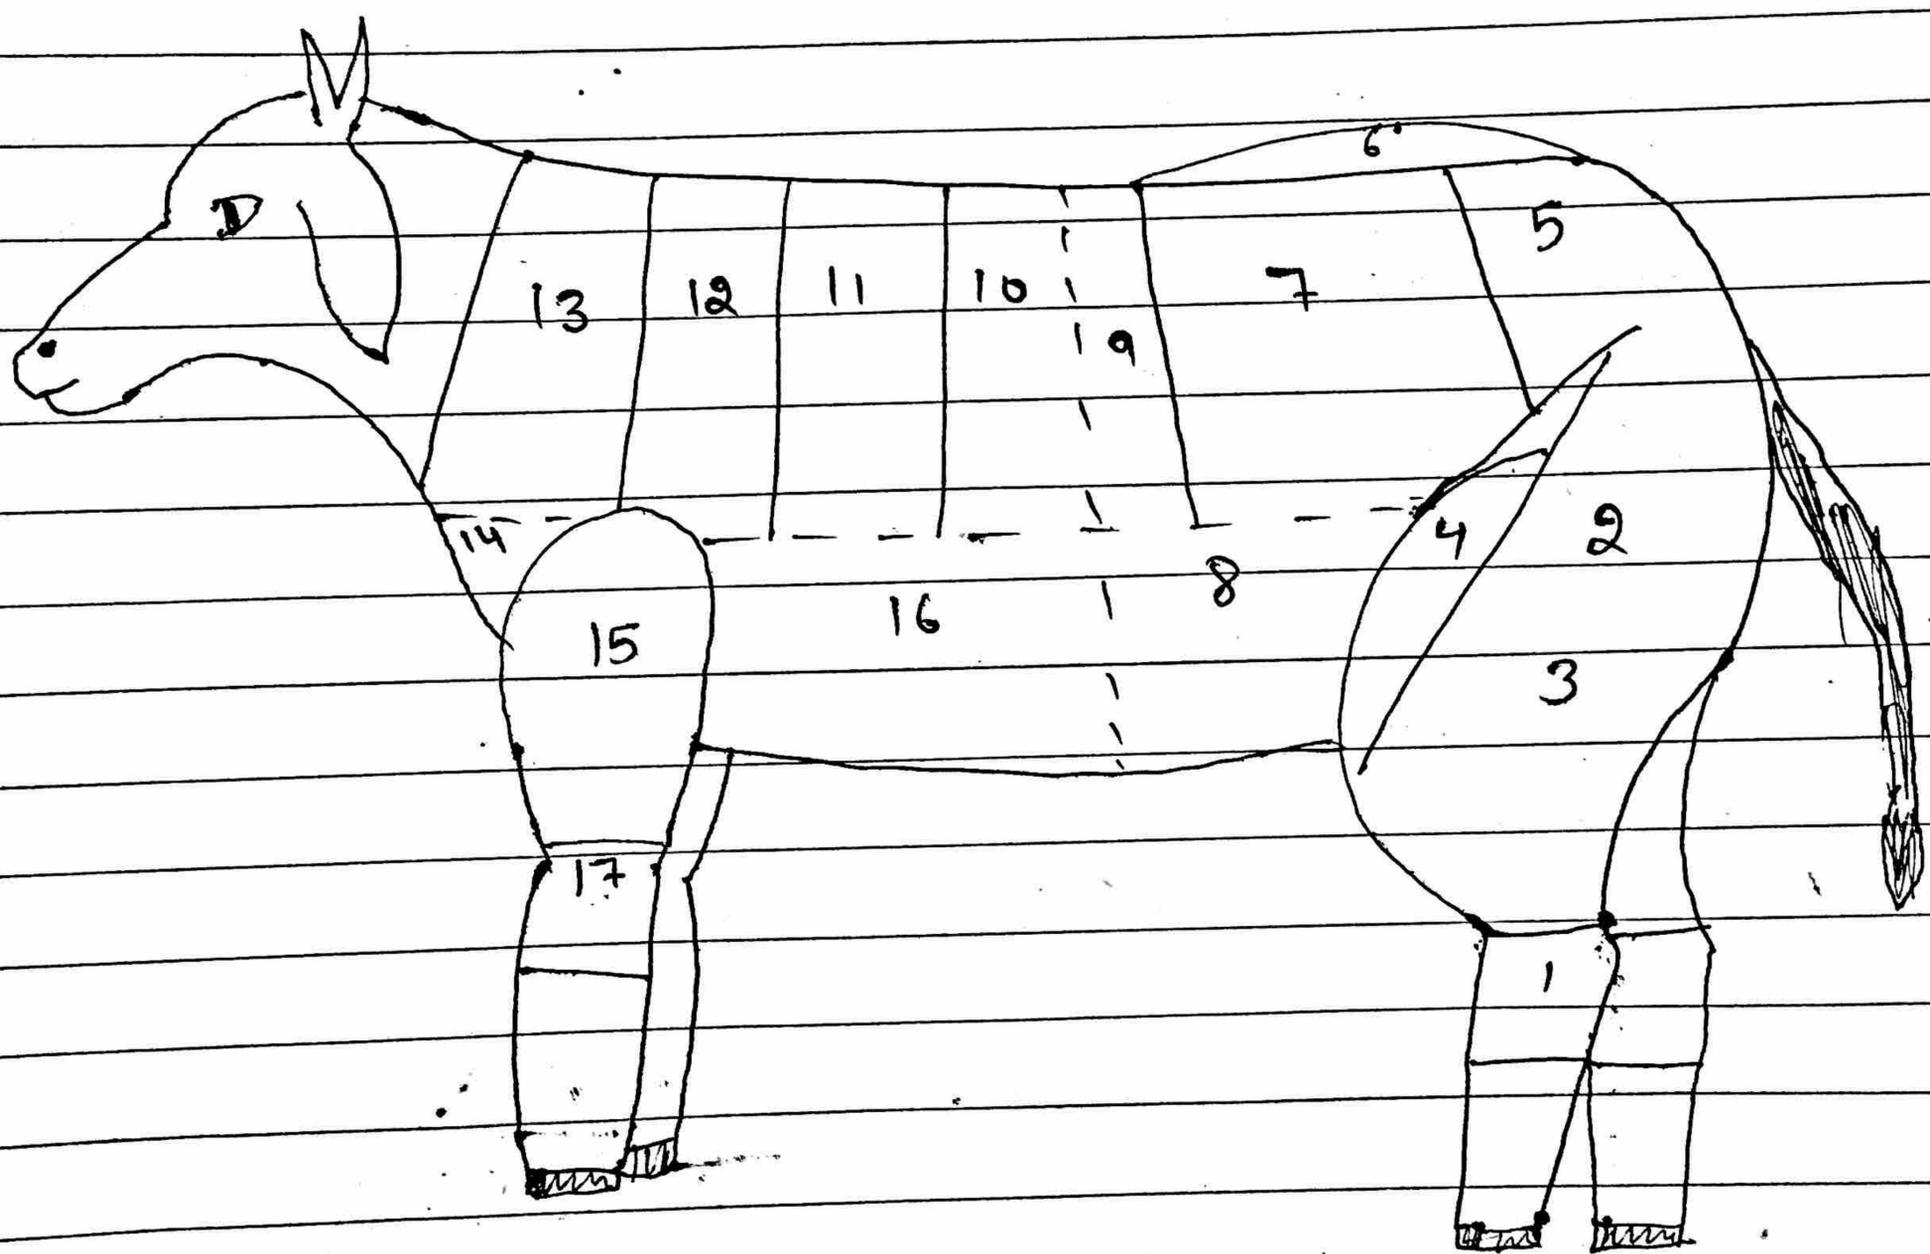

Flesh should be moist not weeping

Bone should be pinkish white and fairly flexible to touch.

Beef

5. The meat should be fresh and chilled. It should not be frozen.

Cuts of Beef (Avg Wt. - 180 Kgs)

Sheep and Lamb

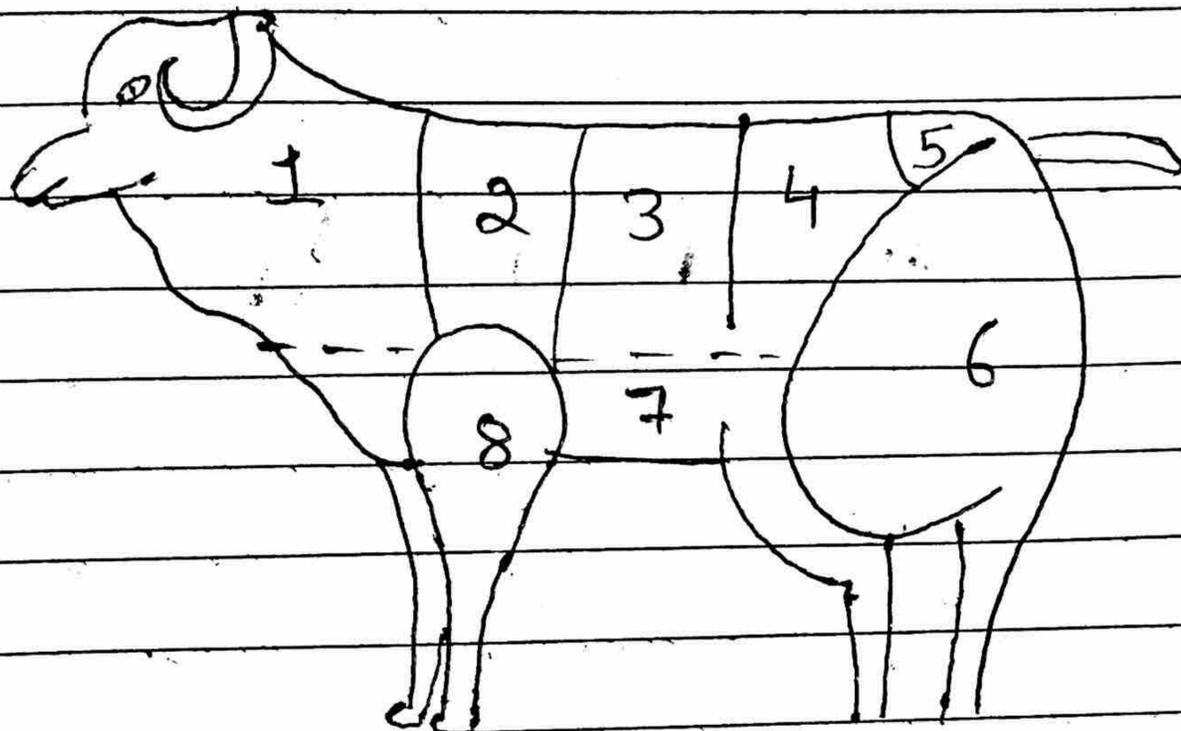

Lamb is a sheep less than a year old, typically ~~stottered~~ slaughtered between the ages of 4 and 12 months.

Older sheep is called mutton and has a much stronger flavour and tougher meat that many find distasteful.

Quality of Meat

1. The flesh should be compact and even.
2. Should have firm and lean meat (less of fat).
3. Should have a pleasing firm red color with fine texture.
4. Should have an even distribution of white fat.
5. Bones in young ones should be pink and porous.
6. In old ones, the bones are white and hard.

Cuts of sheep / Lamb
